

QUICK INSTALL

Please read and follow the installation instructions below to get started.

Attention: Please ensure that your system fits the minimum system requirements as follows:

- Pentium III 500 MHz or higher
- 128 MB RAM
- Microsoft Windows 98 Second Edition, Windows Me, Windows NT 4.0 SP 6, Windows 2000, Windows XP
- 30 MB of disk storage for applications and driver
- Graphics card PCI or AGP, direct hardware overlay support recommended
- Sound Blaster compatible Audio card
- Microsoft Internet Explorer (web browser) version 5.5 or later installed
- Microsoft Windows Media Player Version 7 or later
- Microsoft DirectX 7 or later

1. Turn off the PC, open the side panel of your PC and insert the DVB card in a free PCI slot. Tighten the screw of the DVB board and replace the side panel of your computer case.
2. Boot your machine, the hardware assistant asks for the new driver. The file **oemsetup.inf** can be found on the installation CD in the root. Please follow the driver installation procedure and reboot your system after successful installation.
3. To install the software double click the setup.exe file in the install directory of the installation CD rom. The installation routine will guide you through the installation process. Win 98 users will maybe asked to insert the Win 98 installation CD during the installation. Please reboot your machine at the end of the installation.
4. Please start the Setup4PC application and configure your reception settings by selecting the respective settings in the settings tab.
